

## Horseman Introduces New Desktop 4x5" Lupe 2X to examine 4x5", 6x9cm, 6x12cm formats film on the light box.

This foldable 2X lupe comes with unique supplementary 5X and 10X magnifiers in its two corners for critical checking and a lupe lid. It's designed to be optically corrected and ensures edge-to-edge sharpness and allows the user to observe the entire 4x5" viewing area in exceptional imaging quality. It is ideal for examining 4x5" transparency for perfect sharpness. Plus a unique application feature will be given to help so-to-speak the people who have reached middle age in terms of eyesight in reading through this 2X magnifier.

If you face a constant need for examining transparency, this versatile magnifying lupe represents an excellent investment.
