### Horseman 45FA

Presenting the exciting new Horseman 45FA, a precision photographic instrument that sets unprecedented standards for superb performance and quality in the compact, 4 x 5" technical camera class. Thorough attention to detail at both the design and production stages has resulted in a complete range of precise camera movements in a strong yet surprisingly lightweight package. This new camera has been designated the "FA," which stands for "Fine Art," to underscore its excellent suitability as a versatile tool for the fine-art photographer.

### *Light, Compact 4 x 5" Format*

An extremely high-precision 4 x 5" compact camera, the 45FA which is amazingly light - a mere 2kg. That's about what a 35mm SLR body with two lenses (standard and telephoto) weighs. This lightweight, compact body is of tough and durable construction to survive even rugged field conditions without coming to harm.

### *A Full Range of Camera Movements*

Advanced image management is made easy by the 45FA's complete range of movements, with strong, precisely aligned components and smoothly functioning controls. Even with wide-angle lenses, full rise is possible thanks to a swingable flap on the camera body. Horseman's state-of-the-art design know-how and precision manufacturing skills have been perfectly integrated in the 45FA to provide a new degree of versatility for amateur and professional photographers alike.
