

1998 WINNER

Academy of Motion Picture Arts and Sciences Scientific and Engineering Award!

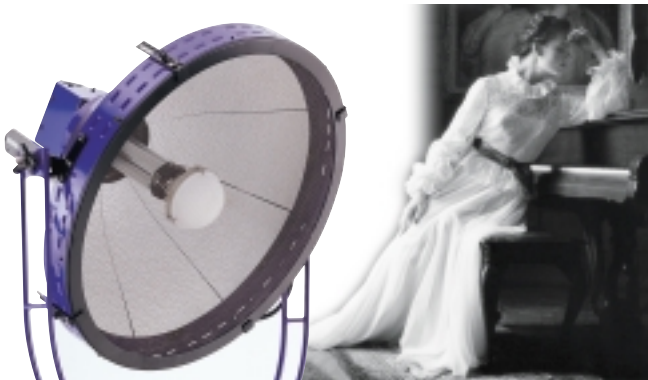

1999 WINNER

Academy of Television Arts and Sciences Engineering Emmy Award!

WHEN "SOFTLIGHTS" AREN'T SOFT ENOUGH

SEE THE LIGHT... SEE A DEMO!

LIGHTING

The first softlight in over 70 years to win the Scientific and Engineering Award from the Academy of Motion Picture Arts and Sciences and the first one in over 51 years to win an Engineering Emmy from the Academy of Television Arts and Sciences. AURASOFT softlights feature a unique reflector design utilising thousands of micro-bubble-mirrors of varying sizes that mix and soften the light. At the same time it renders an output gain of up to 1 stop over similar soft lights of the same wattage. The 120° coverage is incredibly even from centre to edge and produces realistic depth and dramatic presence. Available in 600mm or 800mm dia., with interchangeable tungsten, HMI or flash light sources to 4kw making Aurasoft ideal for use in the studio or on location.
